Report the contributory earnings for the period of service in the first year of the final 5 year period of employment. The first year will be 5 years before the current year. For example, if the member's last day worked is August 2, 2017, report earnings paid in 2012 starting on August 3, 2012 (you may have to split a pay period to get these earnings), up to the last pay in the calendar year (which does not necessarily coincide with December 31, 2012).
